Task 3a,

### **How to learn English, and why?**

We learn English every day, from English classes in school or from the television at home. English have become more and more important languages during these last years. Why is English so important? English is the international languages that why. You use them on vacation to other land, you use them on work, you use the to communicate with people from other country. The world has been so depend on each other that it is important to communicate with each other. You must be able to communicate with other from different country. But to learn a new language is not easy.

#### *Is English that crucial for finding a job?*

Is may be, it depend on what kind of job you are looking for, but mostly you need English in all king of job. That is because in every job it require some kind of communication with other person, even so it exist work like newspaper boy that don't require English, but I can promise; you will not get pay good on those job. In different job it require different kind for use of English, like work in office, you will need more like leading and writing English, and in work were you are selling something it is best that you can talk and understand English. It is likely you will meet someone that only talk English to you. In addition to that I want to say that someone may say that English is no all that important but that what you have the ability that you require to your job, even so that may be true, that is no loses if you learn English to. For you will get use for itin anyway.

#### *Easy way to learn English...*

For the first it is important that you are not affraid to use English, even if itis sound strange or wrong. If you never use what you can you can never improve. And watch English television, most people learn automatically by watching American's movies. You hear how the word sound and used, beside it is maybe the most fun way to do it. Listening to English music is another way to make learning English little bit more fun. By listening to the song and read the lyric it will help a lot, maybe even sing it out. These are the most used way to learn English because it does not require so much work, despite the fact that it does not help you so much with the grammar. And some film and music may have some wrong written grammar.

#### *The other way*

In order to improve your grammar you need to read more English like newspaper and English book also do some task, it will definitive help. In theory it is the best way to learn English, but it is sometime just to boring for someone to execute it. That is where school come in to place. At school you are force to do the grammar and read the text and do exercise with. To say it that way, "it is easier to understand English than learning English."

#### *Avoid!*

Something you should avoid [is the] use of translation program. While it is very helpful when you translate one word at the time, but sentence and create a whole new meaning. So be warn of thing on Internet, not every thing is trustable.

#### *At final...*

Maybe not every job require English, but everything is staring to be more and more English, so think about it, today that job don't require English but tomorrow it may require. Learn English cause you will need it someday, maybe on a vacation on another country. And the easiest way to learn it is to surround yourself with it, with English music, English book, English movie and English lesson, by talking and heard English. As long you use English you will learn English.
